

Habiba Ahmed Hussein

Alexandria, Egypt | +20 155 665 0026 | es.habiba.mamoun2023@alexu.edu.eg | LinkedIn | GitHub

Career Objective

Driven Computer and Communication Engineering student with practical experience building full-stack .NET systems and intelligent AI platforms. Passionate about agentic AI and Clean Architecture, seeking an engineering role to build scalable, high-performance systems.

Education

Alexandria University Expected June 2028
B.Sc. in Computer and Communication Engineering, Faculty of Engineering
CGPA: 3.81/4.0

Technical Experience

Full-Stack .NET Developer Intern August 2026 – September 2026
Bibliotheca Alexandrina – ICT Department

- Modernized manual library workflows into a deployment-ready Library Management System.
- Collaborated with library staff to design role-based workflows for cataloging, borrowing, and fine-tracking.
- Applied Clean Architecture and SOLID principles to build robust backend RESTful APIs and database schemas.

AI Track Intern August 2026
Sprints Virtual Internship

- Developed **Masar**, an adaptive assessment platform using a Bayesian engine to dynamically evaluate skills.
- Engineered dynamic pipeline for JSON question-bank ingestion, adaptive selection, and personalized LLM feedback.
- Built multi-type auto-grading pipelines combining exact-match, sandboxed code execution, and LLM rubric judging.

Full-Stack .NET Developer Trainee November 2025 – July 2026
Digital Egypt Pioneers Initiative (DEPI) – MCIT

- Selected for an intensive national program focused on enterprise-grade .NET development.
- Applied Clean Architecture, SOLID design patterns, and RESTful APIs using C#, ASP.NET Core, and SQL Server.
- Awarded **1st Place (Best Mega Project)** across all track teams for the CodeBook capstone platform.

Information Technology Intern August 2025
Sidi Krer Petroleum Co. (Sidpec)

- Configured LAN/WAN network infrastructure and applied firewall security patches to enhance protection.
- Automated routine system diagnostics using C#, reducing manual monitoring overhead.

Projects

CodeBook – Developer Social Platform | *ASP.NET Core, EF Core, SQL Server, Azure* | GitHub
• **1st Place / Best Mega Project** in DEPI .NET Track; co-built full-stack social platform for developers.
• Implemented code sharing, cross-language translation, gated communities, JWT authentication, and Azure deployment.

Library Management System | *ASP.NET Core, EF Core, SQL Server, JS, HTML/CSS* | GitHub
• Built end-to-end management software featuring cataloging, member registration, borrowing, and automated fines.
• Designed role-based authorization for librarians/members following Clean Architecture and RESTful API standards.

Masar Adaptive Assessment | *Python, LLM Integration, Docker, Sandbox API* | GitHub
• Engineered dynamic skill estimation using Bayesian modeling, automated code sandboxing, and LLM rubric judging.
• Containerized services with Docker for scalable, standardized microservice deployment.

Skills

Programming Languages: C, C++, C#, Java, Python, JavaScript, HTML5, CSS
Web Development & Frameworks: ASP.NET Core, Entity Framework Core, RESTful APIs
Databases & Cloud Services: Microsoft SQL Server, MySQL, Azure App Service
DevOps, Tools & Architecture: Git/GitHub, Docker, Visual Studio, MATLAB, Clean Architecture, SOLID Principles

Honors & Certifications

1st Place / Best Mega Project, DEPI .NET Full Stack Track – awarded for CodeBook.
DEPI Full-Stack .NET Certificate, MCIT (Nov 2025 – Jul 2026) | **Java SE I & II** | **Database Fundamentals** (MySQL)

Extracurricular Activities

Planetarium Science Center, Bibliotheca Alexandrina January 2025 – Present
• Volunteer Organizer: Coordinated Book Fair logistics, inter-team communications, and event scheduling.

IEEE SSCS Alexandria Student Branch March 2025 – September 2025
• PR Volunteer: Represented IEEE SSCS at institutional events; completed IEEE AlexTreme Bootcamp.
